PRECISION. PERFORMANCE. POSSIBILITIES.

Profile Extrusions

Innovative sealing and extrusion solutions for glass, door and architectural applications.

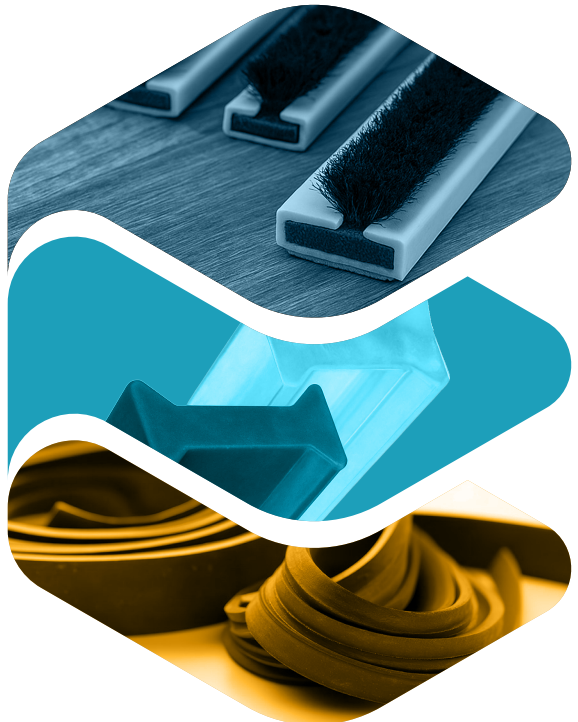

Introducing **everseals uk**

Everseals UK is a new name in **precision-engineered rubber and plastic profile extrusions**, backed by years of industry expertise and advanced in-house manufacturing. From **fire seals** and **acoustic glass partitions** to **window gaskets** and **flexible PVC**, we deliver high-performance profiles for any environment. Our new extrusion line ensures full production control and offers standard or bespoke profiles, including **co-extrusion**, **rigid** or **flexible PVC**, and self-adhesive technical tapes.

Why choose **everseals uk**

- UK-manufactured, quality-controlled profiles
- Bespoke design and tooling capability
- Wide range of polymers: PVC, EPDM, TPE, ABS, and more
- In-line adhesive application
- Fast turnaround and export support

Applications

FIRE SEALS & DOOR SYSTEMS

Engineered to protect and perform. Our extruded fire, smoke and acoustic door seals deliver reliable performance in demanding environments. Available in EPDM, silicone, or PVC, with adhesive backing options for quick installation.

Applications:

- Fire & smoke containment
- Acoustic door systems
- Timber and metal door sets

GLASS PARTITIONING

Create seamless spaces with precision. Our dry-joint and glazing gasket systems are designed for frameless and framed glass partitions, offering a clean aesthetic and reliable acoustic performance.

Profiles include:

- I, H, and corner joints
- Door side, top, and bottom seals
- Cover trims and U-channels

Benefits:

- Silicone-free dry joints
- Clear or coloured PVC/EPDM options
- Improved sound control

WINDOW & GASKET SEALS

Precision-fit extrusions for glazing and curtain walling. Our gaskets ensure durable sealing, weatherproofing, and vibration resistance in aluminium, timber, or uPVC systems.

Features:

- Excellent UV and ozone resistance
- Thermal and acoustic insulation
- Custom shapes and hardness grades

Materials Expertise

Our extrusion capability covers a full spectrum of polymers and rubbers:

EPDM

Outstanding weather and temperature resistance

PVC (Rigid/Flexible)

Cost-effective and versatile

TPR / TPE

Excellent flex-fatigue and recyclability

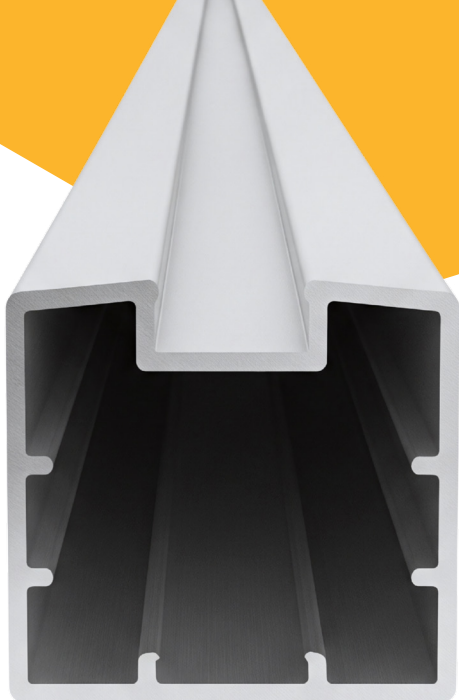

Neoprene / NBR

Fuel and fire-resistant options

ABS / Polycarbonate

Rigid structural profiles

We also offer **co-extrusion** and **sponge rubber** solutions for specialist performance.

Custom Solutions

Need something unique?

Our technical team can develop custom tooling to your specification, helping you bring your design to life quickly and efficiently.

Add-On Options:

- In-line self-adhesive tape application
- Printing, embossing, and colour matching
- Short or large-batch production
